## 1 Introduction

Stantec Australia Pty Ltd commissioned Tonkin & Taylor Pty Ltd (T+T) to conduct a Preliminary Environmental site Investigation (PSI) of a property described as 'Northern Land Parcel' in Ballarat West and defined on the plan provided to T+T by Stantec<sup>1</sup> (the 'Site'). Refer Figure 1 in Appendix A for regional site location.

It is understood the Northern Land Parcel of the Ballarat West Employment Zone is located in Lot A of plan PS816497, Learmonth Road, Mitchell Park. Development Victoria is planning to develop the greenfield site into an industrial subdivision. A PSI is required to provide information on the potential for contamination on the site which may constrain the proposed development.

### 1.1 Objective

The objective of the investigation is to identify potential sources of contamination and the types of contaminants that are likely to be present on site based on current and former land uses.

This investigation was undertaken in general accordance with relevant industry standards including the National Environment Protection (Assessment of Site Contamination) 1999, as amended in 2013 (NEPC, 1999) ('ASC NEPM') and Australia Standard AS4482.1:2005 *Guide to the investigation and sampling of sites with potentially contaminated soil*.

### 1.2 Scope of works

To meet the objective of the investigation, the following scope of work was undertaken:

- A desktop review for investigation of site history, including a review of historical certificates of title (to understand past ownership and land uses), historical business directory listings, historical aerial photographs, review of publicly available EPA, and other publicly available, records.
- An inspection of the site and surrounds to confirm the current layout and land use(s), the presence of potential contamination sources, evidence of filling, indicators of historical contamination and waste handling practices.
- Preparation of this report summarising the works undertaken, identification of potential contamination that might constrain the proposed develop, comment on the suitability of the site for the proposed development with recommendations for further works if required, and comment on the requirement for an environmental audit with regard to Planning Practice Note 30 – Potentially Contaminated Land.

## 2 Site Characterisation

The Site is located at Learmonth Road, Mitchell Park, Lot A on Plan of Subdivision PS816497 (refer Figure 1 in Appendix A). Refer to Table 2-1 for general information about the Site.

**Table 2-1: Site Identification**

<b>Site Name</b>	Northern Land Parcel – Ballarat West
<b>Site Address</b>	Learmonth Road, Mitchell Park 3355
<b>Total Site Area</b>	Approximately 60 hectares

<sup>1</sup> Stantec (undated) Ballarat West Employment Zone Infrastructure Plan Stage 2. Drawing ref. 36266 CI-2-060-SK1 Rev D.

<b>Title Identification Details</b>	Lot A on Plan of Subdivision PS816497 (Refer to Appendix B)
<b>Current Zoning – Planning Zone</b>	Special Use Zone (SUZ) (refer Appendix B)
<b>Former Use</b>	Vacant
<b>Current Site Use</b>	Vacant (used for annual swap meet)
<b>Proposed Site Use</b>	Commercial use

The site is situated between Sunraysia Drive to the north and Airport Road to the south. The site has an irregular shape and is currently cleared grassland. A copy of the Planning Property Report is provided in Appendix B.

## 2.1 Adjoining land uses

The adjoining land uses to the Site are detailed in Table 2-2. The land immediately surrounding the Site is zoned 'Special Use', 'Residential' and 'Farming'.

**Table 2-2: Surrounding land uses**

Direction	Surrounding land use
North	The land to the north is occupied by residential properties to the north east and Ballarat Airport to the north west.
East	The land to east is predominantly residential with commercial industrial past this.
South	The land to the south is vacant but being developed for commercial use.
West	The land to the west is largely occupied by Ballarat Airport.

## 3 Environmental Setting

### 3.1 Topography

Information provided on the Visualising Victoria's Groundwater<sup>2</sup> (VVG) website indicates the site elevation ranges from 442 m Australian Height Datum (AHD) in the south to 436 m AHD in the north. The site is relatively flat and not undulating. The surrounding land is also relatively flat and falls from the south to the north.

### 3.2 Geology and hydrogeology

#### 3.2.1 Regional and site specific geology

The VVG information reviewed indicates the regional geology and that of the subject site is predominantly Newer Volcanic Group basaltic soils of the Miocene and Holocene periods. Geology of this unit presents as alkali basalt, tuff, scoria, with minor alluvium.

#### 3.2.2 Hydrogeology

The Victorian Groundwater Beneficial Use Map, South Western Water Table Aquifer Map (DCNR 1995) indicates that the Site and surrounding area is underlain by an Upper Tertiary aquifer and that this aquifer was likely to have a salinity of between 1,000 – 3,500 mg/L total dissolved solids (TDS),

<sup>2</sup> [http://beta.vvg.org.au/vvg\\_map.php?agreement=Agree+and+Continue](http://beta.vvg.org.au/vvg_map.php?agreement=Agree+and+Continue)

which would likely classify the groundwater as Segment B under the Victorian Governments Environment Reference Standards (May 2021).

The Department of Primary Industry / Port Phillip and Westernport Catchment Authority publication Glenelg Hopkins Groundwater Flow Systems, Version 1, January 2004 was referenced with respect to gaining further regional hydrogeological information. The 'groundwater flow system 14' document indicates that the uppermost groundwater flow system in the region is likely to be within the Volcanic Plains basalt.

As detailed in 'groundwater flow system 14', the characteristics of the regional aquifer may be summarised below:

- Aquifer type: fractured rock.
- Groundwater salinity: 500 to 10,000 mg/L TDS.
- Hydraulic conductivity: probably from  $10^{-2}$  m/d to 102 m/d.
- Hydraulic gradient: estimated to be very low (0.0001) in regional systems and low (0.001) in intermediate systems.

### 3.3 Groundwater bore database investigation

A search online of the 'Visualising Victoria's Groundwater' database (24/1/2022) found 8 bores registered within 1 km of the site centroid. Additional information provided on the registered bores included lithology logged as clay to a depth of 4 m bgl and then basalt to 66 m bgl. No additional information was provided for the bores identified.

The bore identified are listed in Table 3-1.

**Table 3-1: Registered groundwater bores**

Bore ID	Depth (m)	Date of install	Registered use
306443	116	31/2/1890	Unknown
306444	107	31/12/1890	Unknown
306450	133.5	31/12/1890	Unknown
WRK075276	66	25/8/2013	Observation
WRK094748	4	4/7/2016	Investigation
WRK094749	4	4/7/2016	Investigation
WRK094750	5.5	4/7/2016	Investigation
WRK975873	100	Not specified	Unknown

### 3.4 Natural watercourses, surface runoff and drainage

No natural watercourses are present at the site. The nearest natural watercourse from the site is Burrumbeet Creek located 1.2 km to the north east of the site. There is a wetland area to the north east of the site in the Ballarat Town Common which appears to feed into Burrumbeet Creek.

A small earthen dam is located near the middle of the eastern site boundary. Earthen swale drains are present in the north of the site which appear to divert surface water from the airport and the site to discharge off site in the north west.

## 4 Historical Information Review

### 4.1 Methodology

A site history review was undertaken for this investigation including review of information from various publicly available sources including titles, aerial photographs and EPA Victoria. Based on the site history review the site appears to have only been used both in the past and presently as vacant grassland.

A summary of the site history is presented below.

### 4.2 Aerial photographs

Historical aerial photographs for the site (and the surrounding properties) were reviewed to establish historical land uses.

A summary of aerial photographs that were inspected is provided in Table 4-1. Copies of the photographs are provided in Appendix C.

**Table 4-1: Review of historical aerial photographs**

Photograph	Observations
Date: 1946	<p><b>Site Observations</b></p> <p>The site appears to be vacant grassland. A tributary to Burrumbeet Creek appear to traverse the north portion of the site from west to east.</p> <p><b>Site Surrounds Observations</b></p> <p>Surrounding land appears to be largely cleared grassland. There is what appears to be a located immediately adjacent the middle of the eastern site boundary but the function is unclear from the image.</p>
Date: 1983	<p><b>Site Observations</b></p> <p>Only the northern portion of the site is visible in this image. The site appears unchanged however, the clearer image indicates an earthen dam present in the north east, and what appear to be open channel drainage lines in the north west.</p> <p><b>Site Surrounds Observations</b></p> <p>The runway for the Ballarat Airport is visible to the west. Several residential style structures are visible to the east along with what appear to be a trotting track.</p>
Date: 2004	<p><b>Site Observations</b></p> <p>The site is partially obscured by cloud but appears largely unchanged. Some discoloration in the northern portion of the site is suggestive of surface disturbance. Denser vegetation is visible along the eastern boundary.</p> <p><b>Site Surrounds Observations</b></p> <p>Surrounding land remains largely unchanged. Further residential development has occurred on the eastern site boundary.</p>

Photograph	Observations
Date: 2011	<p><b>Site Observations</b> The site appears largely unchanged from the previous image, and the previous discolouration is no longer visible.</p> <p><b>Site Surrounds Observations</b> The use of the surrounding land for horticulture has increased. What appears to be green houses have been erected in the eastern portion of the site to the south. The dam located to the north west of the subject site has been expanded to the west. Airport Road is visible on the southern boundary.</p>
Date: 2016	<p><b>Site Observations</b> The site appears largely unchanged from the previous image.</p> <p><b>Site Surrounds Observations</b> The land to the east has been further developed for residential use.</p>

### 4.3 Historical Certificates of Title

Historical land title information (historical Certificates of Title) for the Site was obtained from the Department of Sustainability and Environment (refer to Appendix D). The title information indicates the site was previously Crown Land and was transferred to the current proprietor (Development Victoria) on the 5 January 2018. No information from the titles reviewed indicated past site uses that may have resulted in potential contamination.

### 4.4 EPA registers

An online search of the EPA Priority Sites database<sup>3</sup> indicated that the site is not listed as a Priority Site requiring investigation and/or remediation, nor was any Priority Site within 1 km of the site.

A search of the EPA database identified no Certificates or Statements of Environmental Audit for the site or having been completed at a property within 1 km of the site.

A search of the Groundwater Quality Restricted Use Zone (GQRUZ) database indicated that no GQRUZ's were located at or within 1 km of the site. The EPA search information is provided in Appendix E.

### 4.5 Historical directories

The Sands & McDonald registry of businesses and historical Melway Maps were inspected; however, none of the maps extended as far as the site.

### 4.6 Energy Safe Victoria

A search of the cathodic protection database maintained by Energy Safe Victoria was undertaken. The presence of cathodic protection systems may indicate the presence of underground storage tanks. The search results did not report the presence of a cathodic protection system at the site. A copy of the Energy Safe report is provided in Appendix F.

### 4.7 Internet search

An internet search of the site identified that it is used for the Ballarat Swap Meet. This event occurs annually on the last weekend of February and comprises approximately 2,500 stalls buying and

<sup>3</sup> [www.epa.vic.gov.au](http://www.epa.vic.gov.au)

selling parts for cars, motor cycles, vehicle manuals, tools and other collectibles. An aerial image from March 2018 in Appendix F shows the layout of the swap meet.

## **5 Site Inspection**

A site inspection of the site was conducted on 24 January 2022 to identify areas of potential historical or current contamination. Information considered during the site inspection included, but was not limited to, the following:

- Buildings/structures.
- Hardstand/surface coverage.
- Surface condition/staining.
- Distinctive odours.
- Surface drainage/stormwater system.
- Indicators of historical infrastructure.
- Indicators of chemical storage.
- Review of current surrounding land use.
- Observations made during the site inspection are discussed below.

### **5.1 Site layout and structures**

The site is currently vacant grassland. The eastern side of the site has a fenced section with dense tree coverage. A drainage line crosses the northern portion of the site and continues along the treed section of the eastern boundary. The site is largely cleared grassland with some areas of shrubs and bushes. The site is predominantly flat, with a slight rise towards a minor rise in the centre of the site. The site is accessible along unpaved driveways off Sunraysia Drive to the north and Airport Road to the south.

### **5.2 Historical infrastructure**

No historical infrastructure indicative of potential contamination was evident during the inspection.

### **5.3 Previous investigations**

There was no evidence on site of any previous site investigation.

### **5.4 Fuel and chemical storage**

No evidence of any significant fuel or chemical storage was identified during the site inspection.

### **5.5 Inert Waste**

Minor quantities of inert waste were observed across the site, predominantly comprising discarded wire. Three concrete platforms with metal flanges attached at their centres, approximately two metres long and one metre wide, were located on the western boundary of the site. These appear to have been placed there but their use is unclear.

### **5.6 Surrounding land use**

The Ballarat airport is located to the west of the site, including airport terminals and runways. Land to the north of the site includes part of the airport runway, as well as Sunraysia Drive and an area of cleared grassland. Land to the east is comprised of residential properties, with Learmonth Road and

commercial/industrial properties beyond. Land to the south includes some commercial warehouse structures surrounded by cleared grassland.

Photographs taken during the site inspection are provided in Appendix G.

## 6 Potential for Contamination

Based on the above information reviewed there are limited potential contaminants of concern (PCOC) associated with both historic and current land uses. These are summarised in Table 6-1:

**Table 6-1: Potential Contaminant Source and Potential Contaminants of Concern (onsite and offsite)**

Potentially Contaminating Activity / Source	Contaminants of Concern	Potential/ and likely matrix impacted
Cleared grassland may have been subject to herbicide application	Phenoxy herbicides and metals	Low: No evidence of significant agricultural activities / surface and shallow soils

## 7 Conclusion

Based on the information reviewed as part of this investigation and the site inspection, the site generally appears to have a 'low' potential for contamination, with the findings of the investigation indicating that a statutory environmental audit of the site is not required in the context of the proposed development with reference to guidance provided in Planning Practice Note PPN30 Potentially Contaminated Land. Based on the findings of the investigation the site conditions are not considered to constrain the proposed development of the site.

## 8 Applicability

This report has been prepared for the exclusive use of our client Stantec Australia Pty Ltd, with respect to the particular brief given to us and it may not be relied upon in other contexts or for any other purpose, or by any person other than our client, without our prior written agreement.

## Areas of Aboriginal Cultural Heritage Sensitivity

All or part of this parcel is an 'area of cultural heritage sensitivity'.

'Areas of cultural heritage sensitivity' are defined under the Aboriginal Heritage Regulations 2018, and include registered Aboriginal cultural heritage places and land form types that are generally regarded as more likely to contain Aboriginal cultural heritage.

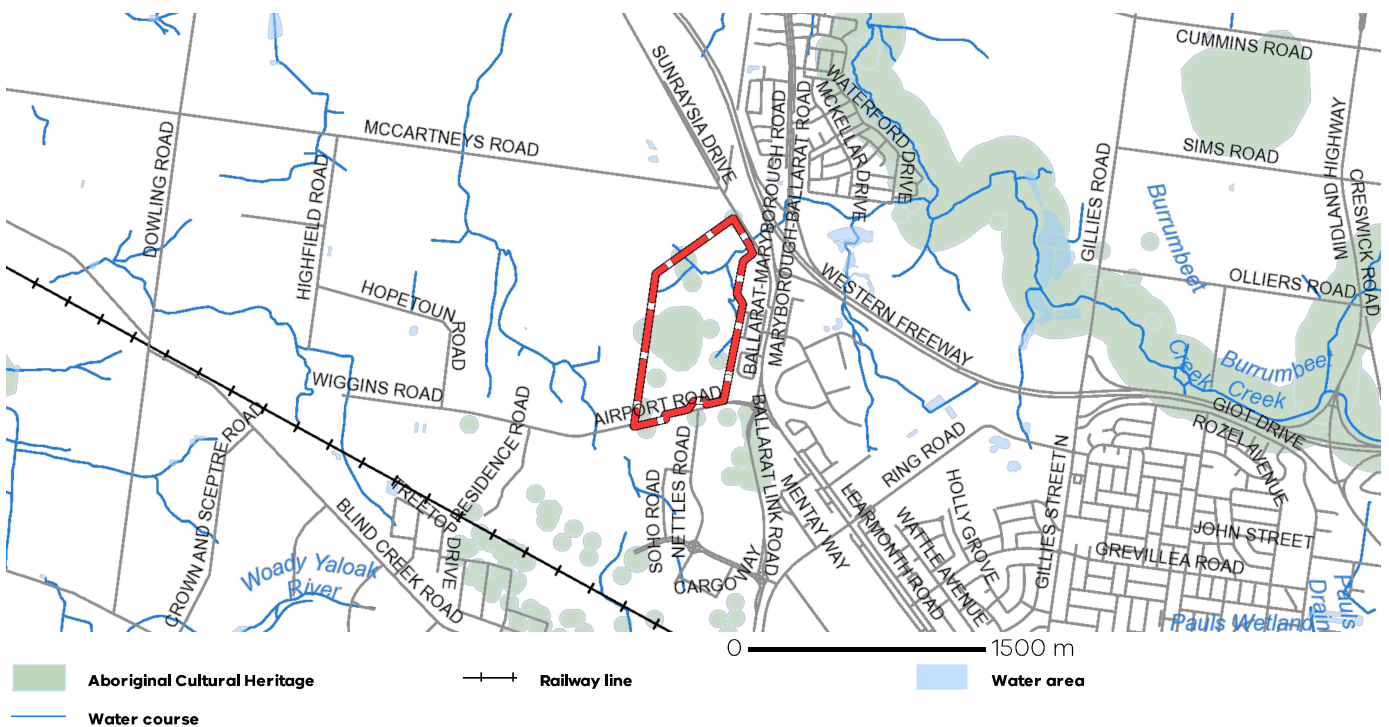

Under the Aboriginal Heritage Regulations 2018, 'areas of cultural heritage sensitivity' are one part of a two part trigger which require a 'cultural heritage management plan' be prepared where a listed 'high impact activity' is proposed.

If a significant land use change is proposed (for example, a subdivision into 3 or more lots), a cultural heritage management plan may be triggered. One or two dwellings, works ancillary to a dwelling, services to a dwelling, alteration of buildings and minor works are examples of works exempt from this requirement.

Under the Aboriginal Heritage Act 2006, where a cultural heritage management plan is required, planning permits, licences and work authorities cannot be issued unless the cultural heritage management plan has been approved for the activity.

For further information about whether a Cultural Heritage Management Plan is required go to <http://www.aav.nrms.net.au/aavQuestion1.aspx>

More information, including links to both the Aboriginal Heritage Act 2006 and the Aboriginal Heritage Regulations 2018, can also be found here - <https://www.aboriginalvictoria.vic.gov.au/aboriginal-heritage-legislation>

## Further Planning Information

Planning scheme data last updated on 20 January 2022.

A **planning scheme** sets out policies and requirements for the use, development and protection of land. This report provides information about the zone and overlay provisions that apply to the selected land. Information about the State and local policy, particular, general and operational provisions of the local planning scheme that may affect the use of this land can be obtained by contacting the local council or by visiting <https://www.planning.vic.gov.au>

This report is NOT a **Planning Certificate** issued pursuant to Section 199 of the **Planning and Environment Act 1987**. It does not include information about exhibited planning scheme amendments, or zonings that may affect the land. To obtain a Planning Certificate go to Titles and Property Certificates at Landata - <https://www.landata.vic.gov.au>

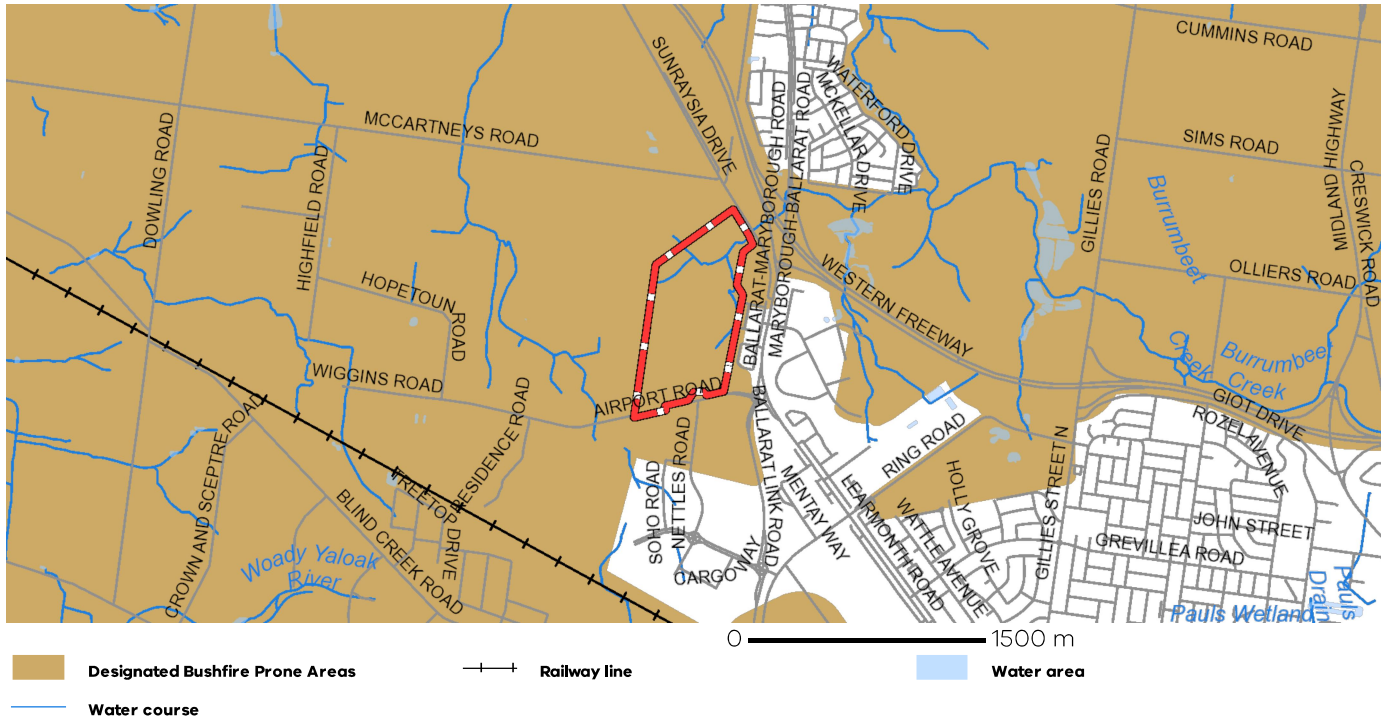

For details of surrounding properties, use this service to get the Reports for properties of interest.

To view planning zones, overlay and heritage information in an interactive format visit <https://mapshare.maps.vic.gov.au/vicplan>

For other information about planning in Victoria visit <https://www.planning.vic.gov.au>

## Designated Bushfire Prone Areas

**This parcel is in a designated bushfire prone area.**  
**Special bushfire construction requirements apply. Planning provisions may apply.**

Designated bushfire prone areas as determined by the Minister for Planning are in effect from 8 September 2011 and amended from time to time.

The Building Regulations 2018 through application of the Building Code of Australia, apply bushfire protection standards for building works in designated bushfire prone areas.

Designated bushfire prone areas maps can be viewed on VicPlan at <https://mapshare.maps.vic.gov.au/vicplan> or at the relevant local council.

Note: prior to 8 September 2011, the whole of Victoria was designated as bushfire prone area for the purposes of the building control system.

Further information about the building control system and building in bushfire prone areas can be found on the Victorian Building Authority website <https://www.vba.vic.gov.au>

Copies of the Building Act and Building Regulations are available from <http://www.legislation.vic.gov.au>

For Planning Scheme Provisions in bushfire areas visit <https://www.planning.vic.gov.au>

## Native Vegetation

Native plants that are indigenous to the region and important for biodiversity might be present on this property. This could include trees, shrubs, herbs, grasses or aquatic plants. There are a range of regulations that may apply including need to obtain a planning permit under Clause 52.17 of the local planning scheme. For more information see [Native Vegetation \(Clause 52.17\)](#) with local variations in [Native Vegetation \(Clause 52.17\) Schedule](#)

To help identify native vegetation on his property and the application of Clause 52.17 please visit the Native Vegetation Information Management system <https://nvim.delwp.vic.gov.au/> and [Native vegetation \(environment.vic.gov.au\)](#) or please contact your relevant council.

You can find out more about the natural values on your property through NatureKit [NatureKit \(environment.vic.gov.au\)](#)

# PRIORITY SITES REGISTER

Information as at 19 October 2021

The Priority Sites Register is updated monthly and the information on it may not be accurate, current or complete and may be subject to change without notice.

Land contaminated by former waste disposal, industrial and similar activities is frequently discovered during changes to land use - for example, from industrial to residential use. In most cases these can be managed at the time that the change of land use occurs. Some sites however, present a potential risk to human health or to the environment and must be dealt with as a priority. Such sites are typically subject to clean-up and/or management under EPA directions.

## WHAT ARE PRIORITY SITES?

Priority Sites are sites for which EPA has issued a:

- Clean Up Notice pursuant to section 62A ) of the Environment Protection Act 1970
- Pollution Abatement Notice pursuant to section 31A or 31B (relevant to land and/or groundwater) of the Environment Protection Act 1970.
- Environment Action Notice pursuant to Section 274 of the Environment Protection Act 2017
- Site Management Order (related to land and groundwater) pursuant to Section 275 of the Environment Protection Act 2017
- Improvement Notice (related to land and groundwater) pursuant to Section 271 of the Environment Protection Act 2017
- Prohibition Notices (related to land and groundwater) pursuant to Section 272 of the Environment Protection Act 2017

These remedial notices are issued on the occupier or controller of the site to require active management of these sites, or where EPA believes it is in the community interest to be notified of a potential contaminated site and this cannot be communicated by any other legislative means. Sites are removed from the Priority Sites Register once all conditions of a Notice have been complied with.

Typically these are sites where pollution of land and/or groundwater presents a potential risk to human health or to the environment. The condition of these sites is not compatible with the current or approved use of the site without active management to reduce the risk to human health and the environment. Such management can include clean up, monitoring and/or institutional controls.

The Priority Sites Register does not list all sites that are known to be contaminated in Victoria. A site should not be presumed to be free of contamination just because it does not appear on the Priority Sites Register. Persons intending to enter into property transactions should be aware that many properties may have been contaminated by past land uses and EPA may not be aware of the presence of contamination. Council and other planning authorities hold information about previous land uses, and it is advisable that such sources of information should also be consulted.

## DISCLAIMER

The Environment Protection Authority does not warrant the accuracy or completeness of information in this Extract and any person using or relying upon such information does so on the basis that the Environment Protection Authority shall bear no responsibility or liability whatsoever for any errors, faults, defects or omissions in the information. Users of this site accept all risks and responsibilities for losses, damages, costs and other consequences resulting directly or indirectly from use of this site and information from it.

To the maximum permitted by law, the EPA excludes all liability to any person directly or indirectly from using this site and information from it.

## Disclaimer

Energy Safe Victoria provides Cathodic Protection system information in good faith, but cannot guarantee the completeness or accuracy of or validate the information provided. The Cathodic Protection (CP) database is a register of currently operating Cathodic Protection systems in Victoria and was established in 1970. The CP database is administered under the Electricity Safety Act 1998 and the Electricity Safety (Cathodic Protection) Regulations 2019. Some underground fuel tanks may not be listed in the CP database including: if the tank is not metallic (therefore not requiring CP); the tank is metallic but CP was not installed; the CP system was not registered, the CP was installed after 26 November 2019 after which galvanic anodes under 250mA were no longer required to be registered; or the CP system has been de-commissioned. If you believe underground tanks may be present and not shown on ESV's CP database you should conduct your own tests and investigations. ESV accepts no responsibility or liability for or arising from your use of, or reliance on, information obtained from the CPS database.

**\*\* If a drawing of the CPS system is required, please contact the CPS Owner**
