

Albert Park Pit Building redevelopment

Extended works area and timelapse camera update

August 2025

Due to the need to extend the work site area, there have been some changes made to how to access the precinct.

Please see the image below for the precinct access changes:

Footpath access

Footpaths to the east, north, and south of the construction site will continue to be closed to accommodate the early works construction site area.

Pedestrian access

Access to the existing pit building will be maintained with clear signage to divert pedestrians around the construction site. We will work closely with our contractors to minimise any potential disruptions for park users.

Traffic management measures

There will be an increase in truck movements near the site this month. Traffic controllers, signage, and bollards will be in place to direct pedestrians, cyclists and vehicles around the extended work site.

Please take note of the changed traffic conditions as you drive past the site.

Outdoor sports courts access

With the extension of the work site, the outdoor sports courts next to the current pit building are now closed.

Timelapse cameras

Our contractor, Icon, has also installed timelapse cameras on-site to track the progression of the redevelopment. Please note, these are not Closed-Circuit Television (CCTV) cameras and are not being used for surveillance.
