Fitzroy Gasworks update October 2022

We are pleased to announce that the Fitzroy Gasworks Development Plan has been approved by the Department Environment, Land, Water and Planning and remediation is now complete.

The approved Development Plan was developed following extensive community and stakeholder consultation and will guide the design and construction of the site. This includes the delivery of approximately 1,200 apartments, 20 per cent of which will be Affordable Housing, approximately 8.7 per cent of the site to be offered as public open space, key sustainability initiatives and much more.

You can read the full Development Plan on the project website.

Remediation was managed by the Department of Treasury and Finance who appointed Enviropacific to safely deliver the works. The independent EPA Environmental Auditor is now finalising the audit to certify that the site is suitable for the next phase of this exciting development.

This is a major milestone for the project which already includes the new Wurun Senior Campus and the start of works for the multi-purpose sports centre.

We look forward to providing you with the next update for Fitzroy Gasworks.
